- Technical SEO
- Schema Markup & Structured Data

Saif Ur Rehman

TECHNICAL SEO SPECIALIST

TO WHOM IT MAY CONCERN,

Hi! I'm a Technical SEO Specialist with 3.5+ years of experience.

I've worked with brands like **SmallBusinessKings**, **Pak e Shop**, and **PestHandler**, helping them improve their search rankings and grow organic traffic.

What sets me apart?

I focus on solving real technical challenges—whether it's fixing site speed, improving site structure, or diving deep into analytics. My expertise in **on-page SEO**, **technical audits**, and **schema markup** delivers **measurable results** for both blogs and e-commerce sites.

I've also collaborated with teams at Intelligent Software Solutions (IGS), helping manage diverse SEO campaigns. My work is driven by data, but I always keep the user in mind for **long-term growth**.

On a personal note:

When I'm not optimizing websites, you'll find me playing **Call of Duty** or **Tekken**, or **cricket**—games that require **focus**, **quick thinking**, and **teamwork**.

Let's connect!

I'm always looking to collaborate with like-minded professionals who are passionate about SEO, growth, and impact.
