Experience

Inlights | UI UX Designer

Islamabad, Pakistan | Jan 2025 - July 2025

- Built fully responsive, high-performance user interfaces for web and mobile applications.
- Ensured seamless functionality, cross-device compatibility, and visually consistent experiences across all screen sizes.
- Implemented adaptive layouts and reusable components to enhance accessibility, performance, and user engagement.
- Collaborated closely with product teams to translate user needs into intuitive, scalable design solutions.

Phebsoft | Front End Developer & UI UX Designer

Islamabad, Pakistan | Mar 2023 - Dec 2024

- Delivered responsive, accessible interfaces using HTML, CSS, JavaScript, React, and Next.js, ensuring seamless performance across modern browsers and devices.
- Created visually engaging, user-centric experiences with optimized loading times and smooth interactions, leveraging modern design principles, responsive layouts, and accessibility standards to enhance usability across diverse devices and audiences.

- Built scalable and maintainable front-end components following industry best practices, ensuring code reusability, modular architecture, and long-term adaptability to evolving project requirements.

Education

University of Gujarat | Bachelor's in Information Technology (2018 - 2022)

Projects

The Pureness

- Designed a responsive website for hair care products, ensuring seamless user experiences across web and mobile platforms.
- Focused on usability, accessibility, and consistent visual identity through modern design principles and adaptive layouts.

Deewan Engineering Solutions

- Crafted an intuitive website for an interior design company with responsive interfaces optimized for multiple devices.
- Applied user-centered design practices to create a visually appealing and easy-to-navigate experience.

W Wellness

- Designed and structured an eCommerce platform for health products, emphasizing clear navigation and user-friendly shopping flows.
- Collaborated with development using React and Next.js to bring scalable design components and cross-platform consistency.

Courier

- Designed the user interface for a courier company's website, focusing on simplicity, accessibility, and smooth user journeys.
- Partnered in development with modern frameworks to deliver a responsive, high-performance experience across devices.
