ENTRY-LEVEL FRONTEND DEVELOPER

Gujranwala, Pakistan | malaikamehar207@gmail.com | +92 328-6276006

PROFILE

Entry-level Front-End Developer with hands-on experience in Java, React.js, Node.js, and Firebase. Developed real-world applications, including a Hospital Management System (FYP), and mobile apps in Android Studio. Strong foundation in Front-End development, database management, and cloud integration. Eager to contribute technical skills to innovative software teams.

PROJECTS

Hospital Management System (MediSyncX) | React.js, Node.js, Firebase

- Developed patient management, billing, and staff scheduling features.
- Integrated cloud storage for real-time data accessibility.

Gym Application | Java, NetBeans

- Built a desktop app for membership tracking and progress reports.
- Implemented backend database operations.

Messaging App | Android Studio

- Implemented real-time messaging with encryption.
- Supported group chats and media sharing.

Text-to-Speech App | Android Studio

- Developed an app converting written text into audio for accessibility.

Speech-to-Text App | Android Studio

- Built an app converting spoken input into text for transcription.
