EDUCATION

2024 - 2025

UNIVERSITY OF HERTFORDSHIRE

Result pending

Bachelors in Computer Science

2022 - 2024

TMUC

Rewarded with Distinction

HND in Computing (CYBERSECURITY)

SKILLS

- C++
- HTML/ CSS
- React Native
- JavaScript
- Kali Linux
- Nmap
- Technical Writing and Documentation

TOOLS

- Android Studio
- Visual Studio
- Adobe Dreamweaver
- Adobe XD
- Figma
- Power BI
- Microsoft Office
- Firebase
- GitHub

LANGUAGES

- English: Fluent
- Urdu: Fluent

CERTIFICATE

- Google UX Design Certification

PROFILE SUMMARY

I am a Computer Science student seeking to apply my technical skills and knowledge in a forward-thinking organization. With knowledge in software development, UX/UI design and cybersecurity, I am eager to contribute to a dynamic team and support innovative projects in technology and digital security.

WORK EXPERIENCE

Digital Empowerment Network

AUG 2024- AUG 2024

UX/UI Designer Intern

Designed intuitive interfaces, conducted user research and improved UX through UI revamps and prototyping.

PROJECT

Perfumery Shop App

THIRD SEMESTER, HND

Android Studio

- Developed an Android app with product listings and personalized recommendations; designed intuitive UI for smooth navigation.

CityBites App

FIRST SEMESTER, 2024

React Native

- Created an Android app listing city restaurants with search, categorization, and location-based filtering; focused on user-friendly UI

Depot Management System

FIRST SEMESTER, 2024

NetBeans

- Built a parcel management app with customer/parcel CRUD, search, fee tracking, and queue management.

Cybersecurity & Penetration Testing

FIRST SEMESTER, 2024

Kali Linux

- Conducted penetration testing on a Linux-based system using ethical hacking techniques.
- Developed security SOPs, created attack trees for risk analysis, and documented findings in a detailed security report.

Balance - Mental Wellness App

FINAL SEMESTER, 2025

VS Code, React Native, GitHub

- Designed and developed a mobile app promoting mental well-being through mood tracking, journaling (text/voice), meditation and habit tracking.
- Built secure backend infrastructure using Firebase (authentication, database) and Cloundinary (media storage).
- Prioritized ethical UX design with minimal data collection, transparent permissions and user-controlled features.
- Conducted competitive feature analysis of top wellness apps to inform design decisions and engagement strategy.
