Professional Summary

UX Designer with a focus on delivering impactful results, eager to tackle dynamic challenges and apply creativity to craft intuitive user experiences. Demonstrated proficiency in project management, user-centric problem-solving, and seamless collaboration across teams. Skilled in leveraging state-of-the-art tools and methodologies to streamline processes and elevate user satisfaction.

Projects

Project #1: Food Ordering App Design

2025 –
Present

Worked on a self-initiated UX/UI design project to create a food ordering app aimed at simplifying the user experience from menu browsing to checkout. Designed wireframes and high-fidelity prototypes in Figma, focusing on intuitive navigation, real-time order tracking, and secure payment flows. This project helped sharpen my skills in mobile app design, UI consistency, and user journey mapping.

Project #2: Ride hailing App Design

2025 –
Present

Designed a ride-hailing app as a personal project to practice user flow optimization and feature prioritization. Used Figma to design core screens including onboarding, ride booking, live tracking, and payment confirmation. Focused on creating a smooth and efficient booking experience with clear UI elements and minimal steps. This project allowed me to explore real-time UX challenges and build experience in designing location-based services.

Project #3: Learning Management System App Design

2025 –
Present

Created a prototype for a learning management system (LMS) as part of my design practice to explore EdTech solutions. Designed an accessible and user-friendly dashboard in Figma for students and teachers to manage courses, assignments, and progress tracking. The project helped build my understanding of multi-user role interfaces and information architecture in educational platforms.
