Profile

UI/UX Designer & Front-End Developer in Figma, Framer, HTML, CSS, JavaScript, and React.js. Experienced in developing user-friendly interfaces and managing complex systems. Seeking a role to apply expertise in UI/UX, front-end development, and system architecture.

Education

Bachelor of Science in Information Technology

Punjab University

My last CPGA was 2.86.

12/2021 – 08/2025
Gujranwala, Pakistan

Work Experiences

MediSyncX

Hospital ManagementSystem

MediSyncX is my final year project for hospitals. I am designing HMS in React.js and Node.js by using Firebase as cloud for online data storing.

12/2024 – 08/2025

Nisat Cosmetics

I created a company logo for Nisat Cosmetics in 2023, February. It is a cosmetics brand having Vitamin C serum, and many other products. The feedback for the logo was excellent.

03/2023

Gym Application

Gym application was my first project of desktop application made in Apache NetBeans IDE 22. I made it using Java in the backend. I learned a lot by doing the Java at the backend in this project.

06/2023 – 09/2023

Text to Speech

Created a text to speech application using Android Studio. A Text-to-Speech (TTS) app converts written text into spoken audio, enabling users to listen to content instead of reading. It is useful for accessibility, language learning, and multitasking, with applications in education, customer service, and AI assistants.

10/2023

Speech to text

Created a speech to text application using Android Studio. A Speech-to-Text (STT) app converts spoken language into written text, allowing users to transcribe conversations, dictations, or commands. It is widely used in voice assistants, transcription services, and accessibility tools for individuals with disabilities.

10/2023

Message Application

11/2023

It was like a clone of a whatsapp. A messaging application allows users to send and receive text, voice, images, and multimedia messages in real time. It can support individual or group chats, end-to-end encryption, and integration with other services for seamless communication.

Skills

Microsoft Office

● ● ● ● ●

complete a certification in Computer course where learned Office overall.

Graphic Designing

● ● ● ● ●

Logo Design, Visiting Cards

UI/UX Design

● ● ● ● ●

Front-end in figma for my FYP project (HMS)

Desktop Application

● ● ● ● ●

Development

Developed a Gym app in Apache NetBeans IDE 22.

Web Development

● ● ● ● ●

Making my final year project (Hospital managment system)

Linux

● ● ● ● ●

Used Linux in Cyber Security short course.

Cisco Packet Tracer

● ● ● ● ●

Used in Cyber Security short course.

HTML, CSS

● ● ● ● ●

Used for starting up my journey of learning Web application.

Mobile Application

● ● ● ● ●

Development

Developed different application like:
Text to speech , Speech to text , Calculator,
etc

Courses

Cyber Ethical Hacker (CEH)

Gujranwala, Pakistan
